Subject: RE: Request for Region 6 FY15 CC and RAPC Planning Data - Due 10/31/14 Please
Date: Wednesday, October 29, 2014 3:31:00 PM

Carlos,

The CC & RA Completion dates I have now are: Star Lake - FY2020; and San Jacinto: FY2021.

Thanks,

Gary Miller

Subject: FW: Request for Region 6 FY15 CC and RAPC Planning Data - Due 10/31/14 Please

Please update your site(s) information for CC and RA completions for FY2015 through FY2017. The Word file has write-ups from last year.

Please provide updates/new paragraphs by Wednesday, October 29, 2014.

Also, for sites that are not on the list, we need to add them to the list with short paragraphs.

These are only estimates, assume that we will be getting RA funding.

Sites that are projected to have RA or CC for FY2015 through 2017 are:

East 67th Street
Sandy Beach
Jones Road
French
Malone
Star Lake
Petro-Chem
South Cavalcade
Van Der Horst
North East 2nd Street
Donna Canal

Subject: Request for Region 6 FY15 CC and RAPC Planning Data - Due 10/31/14 Please

First of all, many thanks again to everybody for the excellent work completed in FY14!!!

It is hard to believe that it is already time for FY15 work planning and updates to the Construction Completion and RA Project Completion spotlight charts. I am sorry to be asking for this data now, but I am sure that you have more accurate information about your FY 15-17 candidate universe than is available in SEMS at this point. Please note that there are two very similar – but distinct – requests contained in this email, with separate instructions.

CONSTRUCTION COMPLETION (FY15 –FY17)

Please provide updated paragraphs for each site you believe could achieve CC in FY15-FY17. As always, we are looking for information on activities necessary to achieve CC, a description of any issues that could affect the schedule, funding issues as well as challenges which may become barriers such as technical or policy issues. Please mention any decision document that is still planned at the site, so that we can coordinate with the HQ remedy selection staff on issues that may impact CC. We do not need a site history or a detailed description of activities at each OU. The paragraphs you submitted last year are attached. Please update the paragraphs and return them to me as a compilation in one Word file.

If the CC date has changed, be sure to specify what caused the change! This goes for all sites, even those that move out of the FY 15-17 planning window.

REMEDIAL ACTION PROJECT COMPLETION (FY15)

Attached is an Excel chart for you to add your FY15 RAPC sites directly into. To help out, I have pasted in the FY14 sites that were delayed and additional out-year information that I had for some regions. Please use this Excel file to add the project description directly into the description column, designate with the appropriate color (green/yellow/red) based on the guidelines provided in the attachment. The information for each project should be brief – describe only the work to be done for the specified RA and any potential obstacles. There is no need to address work at any other part of the site.

FY15 ACS BIDS

Attached is a table of the current FY15 ACS bids for CCs and RAPCs. As you may be aware Robin Richardson, OSRTI Acting Director, has asked the regions to please review your regional bids to see if it is possible to increase before the bidding process closes. Please consider using this work planning exercise as an opportunity to review options to increase your CC and RAPC bids. If you have questions, about the ACS bid process, please contact Art Flaks (703-603-9088) or Lou Belsito (703-603-8708).

DEADLINE

Please return updated information for both FY15 CC and RA Project Completions to me by Friday, October 31, 2014.

Thank you for your continuing help with this!

Attached:

- CCs – most recent paragraphs for updating
- RAPCs – draft Excel table for updating and stoplight chart guidance
- Current FY15 ACS bids for CCs and RAPCs
